

Introducing The WalkAide® Bi-Flex™ Cuff Disposable Liner

A Simple Solution for Efficient Therapy Setup and Trial

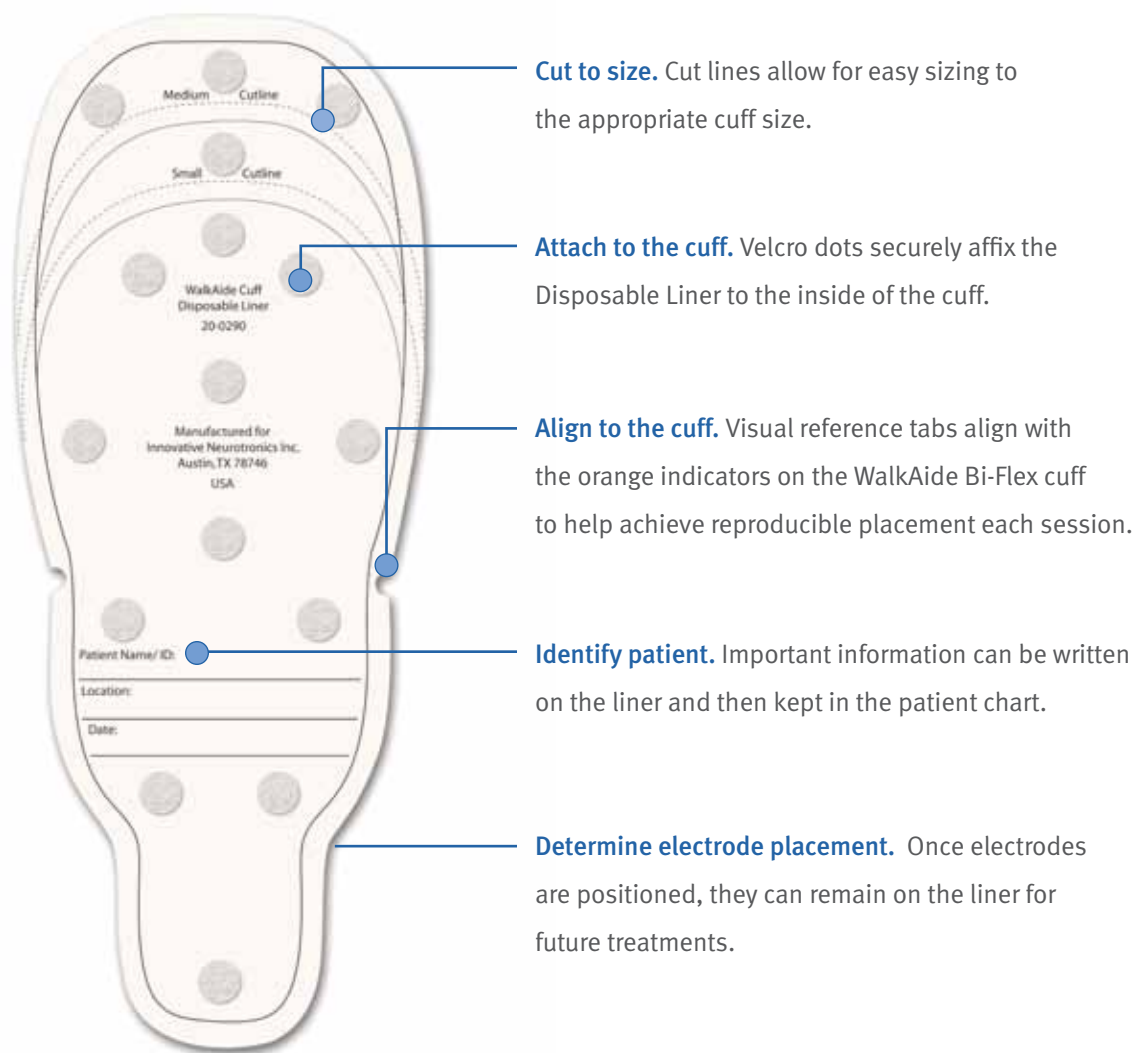

The new Disposable Liner from Innovative Neurotronics Inc. has been specifically designed to ease individual patient setup and adjustment on all WalkAide cuffs. The unique ability to create a customized liner for each patient offers a wide range of clinical benefits:

- **Reduces set up time.** Electrodes can remain on the liner after setup to maintain proper positioning during future therapy sessions.
- **Promotes hygiene.** Designed as a barrier, it allows clinicians to test-fit multiple patients using the same cuff with personalized, individual liners.
- **Sizeable to each patient.** The latex free, hypoallergenic liner can be trimmed to fit all available cuff sizes.

Using The WalkAide® Bi-Flex™ Cuff Disposable Liner

The Disposable Liner is designed to help busy clinicians streamline the WalkAide Cuff fitting process. Durable enough for multiple treatment sessions, the Disposable Liner features a simple, straightforward application:

To order your WalkAide Bi-Flex Cuff Disposable Liners, please call our distributor, SPS at **800.767.7776, Ext. 3**. For Rehab orders, please call **888.884.6462**.
